

ABDUL MOIZ NISAR

Python & Django Developer | Generative AI Engineer

Islamabad, Pakistan | +92 344 5743146
moizdevai@gmail.com | [LinkedIn Profile](#)

PROFESSIONAL SUMMARY

Python & Django Developer specializing in Generative AI Engineering, focused on building intelligent, production-ready backend systems. Experienced in developing LLM-powered chatbot systems, automation tools such as web crawlers, and Django-based messaging systems. Skilled at integrating large language model APIs into scalable Django backends and leveraging AI-assisted development workflows to accelerate delivery. Strong computer science foundation currently being built through a BSCS at Virtual University of Pakistan, combined with hands-on, project-based experience in modern AI application development.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL, HTML5, CSS3

Backend Development: Django, Django REST Framework, Flask, RESTful API Design, MVC/MVT Architecture

Generative AI & LLM Engineering: Generative AI (GenAI), LLM Application Development, Retrieval-Augmented Generation (RAG), AI Agents / Agentic AI, Prompt Engineering

AI Integration & Tools: AI API Integration (OpenAI, Anthropic Claude), LangChain, Vector Databases, AI-Powered Application Development, AI-Assisted Software Development (Claude, Claude Code)

Databases: PostgreSQL, MySQL, SQLite

Tools & Platforms: Git, GitHub, VS Code, Postman, Docker (basics), Linux/Ubuntu

Core Concepts: Object-Oriented Programming, Version Control, Data Structures & Algorithms (fundamentals)

PROJECTS

AI Chatbot System

Python, Django, LLM APIs

- Developed an AI-powered chatbot system with a Django backend, capable of handling real-time user queries and generating natural, context-aware responses.
- Integrated a large language model API and designed RESTful endpoints to connect the chatbot with the application frontend.

Python Web Crawler

Python, Web Scraping, Automation

- Built a Python-based web crawler to automatically extract and organize data from websites for further processing and analysis.
- Implemented logic for structured data extraction, storage, and error handling to ensure reliable, repeatable crawls.

SMS Management System

Python, Django, SQL

- Designed and developed a Django-based SMS system for sending, tracking, and managing text message communications.
- Built a relational database structure to store message logs, delivery status, and recipient records.
- Implemented backend logic and RESTful endpoints to integrate the SMS system with other application modules.

EDUCATION

Bachelor of Science in Computer Science (BSCS)

2024 – Present

Virtual University of Pakistan

LANGUAGES

English (Professional Proficiency) | Urdu (Native)
